

Blastco®
a TF Warren Company

Field applicators of protective coatings and linings

The U.S. coatings industry has been recognized as a key player in the fight against corrosion of our military ships, planes and tanks. Corrosion of steel, aluminum, and other structural metals erodes the safety and financial stability of industries and countries alike. Fighting corrosion in ships, tanks, planes and equipment costs the Pentagon \$22.9 billion a year. Corrosion costs advanced industrialized nations about 3.5% of GDP to replace damaged material and components, plus a similar amount due to lost production, environmental impact, disrupted transportation, injuries, and fatalities.

Blastco is an abrasive blaster and applicator of protective coatings and linings for steel, aluminum, and other structural metals. To provide local management and engineering support in the Pacific Region, we have opened an office in Guam.

OUR CAPABILITIES

- Conformance to UFGS Specifications
- Conformance to EM 385 (safety requirements)
- Lead abatement
- SSPC QP-1, QP2-1, and QS-1 certified
- 5 Star NIICAP accredited
- NACE certified coating inspector
- Storage tank construction and repairs
- Guam location
- Mechanical and coating repairs
- Shop and field applications
- Fireproofing
- Asbestos licensed
