Linings and Mechanical Repairs**

Rubber Linings

Ultimate Corrosion Control

With Blastech Rail Services you have complete access to an integrated custom lining and coating facility with over 30 years of experience in the rubber industry.

We offer our rubber lining services at our facility in Brantford, Ontario and will provide you with the best quality in the business. We hold ourselves to the highest standards and look forward to protecting your most valuable assets.

Rubber linings offer chemical and abrasion resistance for storing materials such as:

- Ferric chloride
- Ferrous chloride
- Hydrochloric acid
- Phosphoric acid
- Sodium hypochlorite (bleach)

We specialize in the installation of all types of rubber linings:

- Synthetic compounds such as neoprene, chlorobutyl, bromobutyl, and nitrile
- Natural rubbers such as tan gum rubber for HCl storage
- Semi-hard natural rubber for water treatment
- Bone-hard rubber for chemical processing

We are approved applicators for all major rubber manufacturers.

Strip and Reline

At the end of the service life, rubber linings can be stripped from the substrate and replaced with a new rubber lining to service the current requirements.
