Brant Corrosion Control Overview

Brant Corrosion Control was established with the goal of becoming the premier lining and coating systems applicator in North America.

With over 30 years of service, we continue to dedicate ourselves to the highest level of quality which our customers have come to expect from Brant Corrosion Control. We cooperatively work with any third party inspectors to ensure quality control documentation meets all of your requirements.

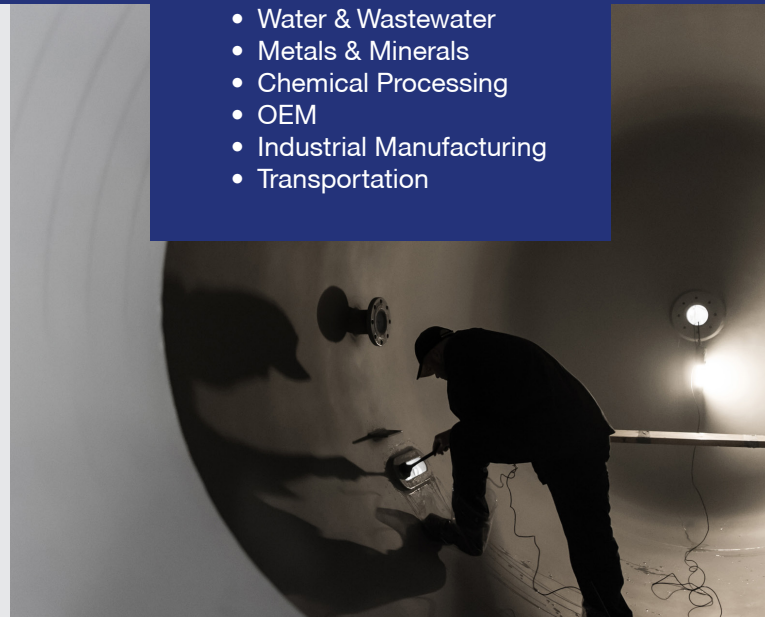

Brant Corrosion Control assures corrosion protection using rubber linings, liquid coatings, and powder coatings; all coating systems can be tailored specifically to your project.

Our capabilities include:

- 69,000 ft² of indoor, climate controlled space
- Overhead shop cranes with combined 40 ton lift capacity
- Ovens; up to 15'W x 17'H x 30'L and up to 900° F
- Autoclave 10' dia. x 62' long
- Project management

We also offer on-site rubber lining installation, inspections, and repairs, as well as protective coating applications for new and maintenance projects. We can mobilize anywhere.

Senior management establishes and develops the means to promote and encourage overall safety awareness and compliance throughout the company. Documenting and evaluating safety performance is equally important as it facilitates the recognition of successful safety achievements of eliminating workplace illnesses and injuries. Safety is always first.
